

VITO XL

The Vito XL is the most user friendly elliptical trainer in its class. With the oversized, easy to read LCD display, the Vito XL is full of features usually found on more expensive models. The 45 lbs flywheel ensures an exceptionally smooth and even and elliptical sequence of movements. The hand pulse sensors provide continuous heart rate data while the training computer offers a recovery feature along with various other settings to aid in the most rigorous training programs.

- Training computer with recovery feature include settings for total distance, time, calories burned and upper pulse limit
- Large LCD high resolution display

- Sturdy powder coated, ergonomically formed tubing frame with customizable footplates, water bottle, transport castors and levelers
- KETTLER® 45 lbs Drive System offers a smooth, fluid and effortless glide that mimics a natural walking or running pattern perfectly
- Heart rate measured by either integrated hand pulse sensors, ear lobe clip or included wireless Polar® T34 heart rate transmitter
- Motor-controlled magnetic resistance, digitally displayed in index of 1 to 10

High quality self-aligning ball bearings for smooth running
